CAREER GOALS

Long-term
In the future, I want to become a
product manager

Short-term
In the next two years, I want to
become a fullstack developer and
have deep knowledge of web
programming

SOFT SKILLS

- *English skill*
Basic communication and reading
comprehension

- **Documentation skill**
Can search, read comprehension
resources, and present

- **Independent work skills**
Theability to work under pressure
and multiple task

- **Team work skill**
good working in a team

- **Exceptional communication and
networking skills**

I'm a self taught programmer, I would love to experience and gain more practical
knowledge in this industry through fresher position. So, my target is to become a
professional web developer and have extensive knowledge in the future

EXPERIENCE

10/2021 - present	**Freelance front-end developer**

- Cut Psd, figma to HTML/CSS
- Build web application with Reactjs
- Interact with API to build website
- Implement features such as filter multiple condition, authentication, infinity scroll,..etc

PROJECTS
